

GoldMine

Version 2018.1HotFix1 - Release Notes

Updated January 23, 2018

Please Note

Run the GoldMine Premium 2018.1HF1 installer for a new installation, or to upgrade GoldMine Premium Edition 9.0.0 or newer.

- If you are upgrading from a version of GoldMine prior to 9.0.0, you must first upgrade to version 9.0.0 before upgrading to this version.

Run the GoldMine Connect 2018.1 installer for a new installation, or to upgrade GoldMine Connect 2015.1 or newer.

- If you are upgrading from a version of GoldMine Connect prior to 2015.1, it is necessary to uninstall the existing version of GoldMine Mobile or GoldMine Connect and install GoldMine Connect 2018.1 as a new installation.

It is recommended that you clear the device/browser cache and restart IIS after an installation/re-installation or upgrade of GoldMine Connect.

What's New in GoldMine 2018.1HF1

Goldmine Premium Edition

- If the "Encode E-mails using character set" value is empty in a user's E-mail Options, GoldMine will use "utf-8" as the default character set.
- The following charsets are fully supported in the current version:
 - UTF-8
 - ISO-8859-1
 - ISO-8859-15
- Full support of UTF-8 in the body of the emails. Although in previous versions we could set the utf-8 as a charset we could not compose emails in some foreign languages (e.g. Arabic), but we could receive them. This issue was fixed in the current version.
- Enabling the Dynamic Update Exchange protocol (DDE)

What's Fixed in GoldMine 2018.1 HF1

232288	Document templates for a particular machine lost the ability to be updated.
242114	When attaching files to an edited email, the body changes to part of the MIME Type info, --nqp=nb64=
242312	Email Draft/Queue Issue
229632	Regression of 253836 - Special characters (e.g. French) will be destroyed when saving an email template >> also when sending such an email to a contact the special characters are gone
